### GREY/BLACK LENS

#### A Grey or Black sunglass lens is ideal for your activities and needs.

Grey or Black sunglass lenses will enhance your vision by:

- Delivering true colours that are unaltered and true to original hue
- Reducing glare in bright sunny conditions
- Grey is a good general-purpose lens colour

Even better, a **polarized Grey** lens provides the additional enhancements to your vision:

- Blocks dangerous and uncomfortable blinding glare
- Delivers greater depth perception
- Substantially enhances contrast
- Provides more precise and detailed vision
- Colours are more vibrant

If you require vision correction and need a prescription sunglass lens, ask your optometrist about NuPolar polarized lenses.

NuPolar are the most recommended polarized prescription lenses by eye-care professionals. NuPolar is trusted to deliver long lasting quality to wearers, provides 100% UV blockage, and delivers exceptional and vibrant outdoor vision.

## GREY LENS STYLES

NUPOLAR<sup>®</sup>  
*solid*

#### Dark Grey or Light Grey

NuPolar solid polarized lenses are an even and solid colour over the entire lens and provide 100% UV blockage.
