

Transitions™

Drivewear®

A Transitions® Drivewear® sunglass lens is an ideal lens for your consideration.

**3 LENSES
INTO ONE**

Combining NuPolar polarization technology and Transitions photochromic technology, Transitions Drivewear lenses adapt to changing light conditions.

The lens changes to three different colours – Olive, Copper, and Dark Brown – while also adapting the level of lens darkness according to light conditions.

Transitions Drivewear will enhance your vision by:

- Blocking dangerous and uncomfortable blinding glare
- Increasing visibility and safety on roads
- Highlighting reds and greens for better signal recognition on the road
- Delivering greater depth perception and enhanced contrast
- Providing more precise and detailed vision
- Experiencing more vibrant colours
- 100% UV blockage
